Executive Summary
The Education Study Material for Form IV which is preloaded on Tablets is a combination of Interactive Study Material and Education Applications that can be accessed through The Digi Library Application. This application is already preinstalled on the Tablets.

The Digi Library Application is an off client Application that structures the content in a logical format and enhances user learning experience. The App also has a strong analytical engine to view the performance analysis of users.
iProf Monitor is Classroom Management Software that enables a virtual environment in which teachers and students can collaborate and interact within the classroom through Tablet. This software is preloaded on the Tablets.

Monitor can take care of all teaching requirements of teachers during the class like sharing one student’s screen to all students, sharing his/her screen with students, taking quizzes, real-time surveys, give & collect assignments, share reference material & much more.

Let’s get started – Checkout the Interactive Study Material on your Tab!

Helloo…By the way we assume that your tablet is charged and you have already switched on your Tablet!!
To get started, simply touch The Digi Library Application (TDL) on Tablet application menu.

What you have to do to get started with The Digi Library Application:

1. Once the Tablet is switched on, following screen will appear, this is the Home screen of the Tablet, user should Touch on Menu icon.
2. Touch on The TDL App icon on the screen.
Welcome, you are now inside The Digi Library Application, this is your Home page!

Functions of Important Icons:

a. To come back on Home Screen (The current screen) from any other screen in the app.
b. Monitor, To switch to iProf Monitor (Classroom Management)
c. To search the content
d. This is to go to user manuals of The Digi Library and iProf Monitor
e. These are subject icons

Touch on any Subject that you would like to study

Additional Content Catalogue

Favorites, view list of favorite chapters

Content Consumption Chart, shows how much content has been viewed

Slider
Going deep, inside a subject – Every Subject has some Study Material element inside it.

- User touches on the subject icon.
- Every subject icon has 3 elements inside it, in the screen below user is touching on the Study Material icon, this is the content element that we will be understanding in detail in the following slides.
Let's explore this content element in more detail, we just assumed that user had touched the Study Material icon on the previous screen! You will see different components under Study material...

Details of Icons, what do they represent?

a. **Animations**: User will be able to view 2D & 3D animations for various learning objects based on Form IV Curriculum.

b. **Multimedia**: User will view learning objects in the form of multimedia Video Lectures.

c. **PDF’s**: View electronic Notes for various chapters and topics in PDF format.

d. **Applications**: This is where user can practice question & answers to check their conceptual knowledge.

e. **Electronic Presentations**: These are power point presentations on different topics giving textual, graphical and pictorial representation of concepts.
Moving on to Interactive Animation icon... The first component!

Get your way through..

7. Simply touch the Interactive Animation Icon on the screen
8. Select the Animation that you want to view

Cost Price and Selling Price

Cost Price (CP):
The money paid by the shopkeeper to the manufacturer or wholesaler to buy the goods is called the cost price (CP) of the goods purchased by the shopkeeper.

Selling Price (SP):
The price at which the shopkeeper sells the goods is called the selling price (SP) of the goods sold by the shopkeeper.
Now peeping into the Multimedia Videos lectures..

Get your way through..Simple & easy

10 Simply touch the Multimedia icon on the screen
11 Select the Video that you want to view
12 User will go inside the Video player and get started with his learning

1. Random Experiment

Suppose we roll a dice. The outcome cannot be predicted but we know that it can show up any one of 1, 2, 3, 4, 5, 6. Such experiments where outcomes are countable and are equally likely essentially under the same condition are called random experiment. Clearly when the outcomes are equally likely, we cannot predict the result on any trial of the experiment.

The tossing of a coin; taking a ball from an
There’s much more to Learning Objects, explore other Interactive content components and Learning Objects..

Get through other learning objects

Simply touch the PDF/Application/Electronic Presentation Icon on the screen and select the Video that you want to view. You can view different learning objects and get started.
1.4 Welcome to the world of education
Apps on your Tab

Users will now be viewing a section that has third party applications. Some of these apps have been preinstalled on the Tablet and for other apps links have been given and they just have to be downloaded from Google Play store!
Going deep, inside a subject – Every Subject has some Study Material elements inside

You must Know!

Every subject icon has 3 elements inside it, we have already covered the Study Material, in the screen no. 2, we can see the other two elements that are Installed Applications and Reference Applications.
After Interactive Study material, the next junction is Installed Applications on The Digi Library Application, let’s find out how user will browse this section...

Access Android preinstalled applications in one touch

18 Simply touch the subject of which applications have to be viewed
19 Touch on the Installed Application icon on the screen
20 You will now be able to view all installed application, select and view any application
Reference Applications are also Android Apps, the only difference is that these applications are links & have to be downloaded from play store. The idea is that user should be able to access & download all applications through single destination that is The Digi Library App...

Access Android reference applications in one touch

21 Simply touch the subject of which applications have to be viewed
22 Touch on the Installed Application icon on the screen
23 You will now be able to view all installed application, select and view any application
Updating your study material and apps on the air could not have been easier!
How to update applications

Step 1: Go to http://MT.TheDigiLibrary.com

Step 2: Go to App Zone section

Step 3: Search the application you wish to update

Step 4: Touch on the application and when prompted Touch on Download / Install.
Points to remember for better user experience on The Digi Library App
The Digi Library Application is a robust platform that works on offline and online mode. However, we still recommend you to follow some basic guidelines when operating the application, this is purely to improve the user experience on the App.

- Always keep the Tablet charged and accessories intact.
- Always press the application and other icons on the screen gently.
- Some icons might be opening a big file so please be patient and wait for the response.
- Make sure that users keep at-least 300 MB space free in the internal memory of the Tablet to load and run the video files and animations efficiently.
- Always keep Date and time on the Tablet updated.
- Make sure that Tablet is connected to internet when browsing and downloading reference Applications.
- Too many Touchs in one go might hang the application, incase application hangs, please reboot the Tablet.
Never make any Application as a default application, this will lock the Tablet with a particular application and user will not be able to browse other applications on the tablet.

Do not remove the license key sticker given on the back side of the tablet, this is important to activate Monitor (Class room Management software).

Never perform CLEAR DATA on any application.

Do not format (or reinstall to Factory settings) the tablet unless very essential. This should only be done as a last resolution.

For any queries and help call Mauritius Telecom Toll Free: 8908

Decoding of iProf Monitor – It’s a Classroom Management Software

2.1 Register and Activate iProf Monitor
2.2 Explore the basics of iProf Monitor
2.3 Functions of Teacher
2.4 Functions of Student
iProf Monitor is Classroom Management Software that enables a virtual environment in which teachers and students can collaborate and interact correctly using technological resources available in the school classroom.

Main Functions of Teacher Login:
1. Sharing Teacher’s Screen
2. Sharing one student’s screen to all students
3. Taking quizzes,
4. Real-time surveys,
5. Provide and collect assignments,

Main Functions of Student Login:
1. Raise Hand
2. Message to Teacher
3. Assignment / Files receiving
4. Assignment / File submission
5. Take Real time surveys and Quizzes

A teacher can also create groups of advanced or lagging behind students and focus on their improvement.

Students can interact with teachers by sending messages, raising hands etc. and receive attention of teachers even in a class that has many students.
2.1 Activation of Monitor, the first step

The first step is to activate the Monitor on your Tablet, before doing that we need to make sure that your tablet is connected to internet!
Let’s first get you connected to internet through a wireless network, this is mandatory to activate your iProf Monitor!

1. Go on the **Apps List in Tablet**

2. Touch **Settings** icon

3. Switch on **Wi-Fi** tab to allow tablet to search for available network

4. Select your wireless network, enter security key, if required & get connected to Wi-Fi
What you have to do to get started with The iProf Monitor:

1. Once the Tablet is switched on, this screen will appear, this is the Home screen of the Tablet, user should Touch on Menu icon
2. Touch on The iProf Monitor icon on the screen

When clicked on iProf Monitor icon at Menu Screen, the application gets launched in student and teacher tablets
Very Important Information:

- The license keys for both Students and Teacher Tablets are pasted on the backside of the Tablet
- Students and Teachers need thus license key to activate iProf Monitor
- Do not remove the license keys from backside of the Tablet
- Incase license key is misplaced, call customer care at 8908 to get your license key
Let’s first learn the ABC of iProf Monitor – Class Room Management software

This module is going to give basic information on iProf Monitor and how’s its used, since it’s important for the users to first understand the software so they can further champion it
# iProf Monitor - Introduction to main Functions and Features of the Classroom management software

## Functions

- **Monitor Student Machines** - Allows screen monitoring on several students simultaneously
- **Instant messenger** - Open a discussion topic between all or a group of students
- **Remote Control** - Allows taking control of student computers
- **File Transfer** - Enables sending files to all / group of students
- **Interactive whiteboard** - Provides a series of graphic tool as teacher aid
- **Manage students’ surveys** - Facilitates feedback from the lesson through a questionnaire

## Features

- **Remote log on and log off** - Remotely shut down, log off or restart the computers of your entire class, a group or a selected student
- **Monitor screens** - Observe the screens of all the students in your class directly from your computer. iProf Monitor lets you view the screens of students, enabling you to see what students are working on at any given time.
- **Broadcast screens** - Demonstrate a concept or example by sharing your desktop or a student’s with everyone in the classroom. Each student can see in detail what you are presenting.
- **Control online access** - Keep students focused on learning by blocking or restricting access to the Internet. With iProf Monitor, teachers can create multiple Internet blocking rules that control what students can access.

1. The Digi Library Application
2. iProf Monitor - Classroom Management Software
3. Basic Troubleshooting
4. Customer Helpline
Empowering users to perform basic troubleshooting on The Digi Library App & other Education Apps

Stuck somewhere? No problems, This section is going to help understand on how to resolve some of the basic application.
Issue 1

How to launch Digi library application?

Solution

☑ Touch the application icon at Menu screen to open applications.
☑ To launch the application Touch on The Digi library application icon.
☑ The application will get launched

No Authentication is required i.e. User ID and Password to launch The Digi Library Application. Also, Wi-Fi connectivity for Login is not required.
Error message: **Unfortunately, The Digi Library app has stopped.**

**Solution**

- Touch on the running app icon on Tablet next to main menu icon and swipe/clear the extra applications to close them.
- If required, Re launch The Digi Library Application, it should work fine.

**Issue 3**

Clear Data – When to do it & Why?

**Solution**

Clear data deletes app’s stored data. This includes all files, settings, accounts, databases etc. If user wants to start with the app fresh and clear his cached data, then he can go for this option.
Factory Re-Set - When to do it & what are its results?

You’ll need to wipe everything and restore your device to its factory state or original state. If tablet is not working or stuck on initial start up logo page. You can even perform a factory reset when your Android phone or tablet won’t boot normally.

**How to do Factory Reset:**
Go to Settings  Back Up & Reset  Factory Data Reset

How to determine the space available in my tab?

**Solution**
Go in settings->Storage> Check the storage under Internal Memory> Around 300 MB should be free for smooth processing of application.

(Not recommended for frequent use, this will cause data loss & will also delete any new applications & multimedia files downloaded in the internal memory of the tablet)
If I accidently remove any application, how can I download it again?

**Solution**

TDL app cannot be uninstalled, as it is bundled with OS. Only Reference/downloaded apps can be removed. User can download the app again through Google Play store.

**Issue 7**

I need Help understanding the TDL app.

**Solution**

Touch the Help icon available on the Header bar of The Digi Library Application. This will open a help file that will guide the user for any navigation issue. Incase you need more assistance on this, please call customer care at 8908
I am not able to hear sound properly, what should I do?

**Solution**

You can Touch on tablet Vol+ and Vol- icon and increase the volume as per the desired level. Also, check if mute is not pressed.

I can hear the sound but I cannot see the video.

**Solution**

This might happen, incase user by mistake has uninstalled or deleted flash payer, to verify, check for Flash player 11.1 or above is installed in the settings>>Application manager. Incase not present, you can download the flash player 11.1 or above or call 8908 for further assistance.
How do I group application on my home screen?

Solution

Touch on main menu icon and whichever application needs to be sent on the home screen has to be dragged and drop on the home screen (main screen).

I am seeing a Registration form pop up on launching the TDL application.

Solution

User will have to register himself/herself by filling in the registration form within 30 days from the activation of Tablet, this is mandatory and needs to be filled to continue the access to of The Digi Library Application.
Trouble shooting guide for all Installed Education Applications, these our Third party android applications available on Google play store

**Issue 1**

What If I accidently remove an installed application, how can I get it back or download it again?

**Solution**

Normally all preinstalled app cannot be uninstalled, as it is bundled with the Factory settings. However updated versions of these applications can be reinstalled from Google play store or Microsite (http://MT.TheDigiLibrary.com)

**Issue 2**

**Solution**

- These applications will be provided on Microsite (http://MT.TheDigiLibrary.com). User can download or reinstall these apps from Microsite.
- Please note that some of these applications requires user to sign in in play store before accessing and pass though license agreement before initialization.
- Also, some of these applications require user to be online for smooth functioning.
Trouble shooting guide for all **Reference Education Applications**, these our Third party android applications available on Google play store

**Issue 1**

I am not able to download applications from play store or Microsite/App zone.

**Solution**

- Android Market place is restricted, therefore before downloading any application from Google Play store user needs to signed in Play store with a valid Gmail id. Please check if you are signed in. If not, please sign in and you will be able to download the app.
- If you are still not able to download the Application, then app might have been removed from Play store or application settings might have changed, please call 8908 for assistance

**Issue 2**

I am not able to download reference applications. What do I do?

**Solution**

To download all reference applications, Wi-Fi is a must, please check your Wi-Fi connectivity, if connected, please check solution is Issue 3, if still not resolved call 8908
Issue 1

Tablet gets hanged while screen broadcast or while using iProf Monitor.

Solution

Wait for two minutes for tablet functioning restoration. In case, it does not resume working, reboot the tablet.

Notes

In case the problem persists, check your APN router configuration and functioning.

Issue 2

I have removed the license key sticker without noting it. How can I get that?

Solution
