THE ANTI-CORRUPTION PROJECT 2013-FORMING AN ANTI-CORRUPTION CLUB AT SCHOOL

The anti-corruption project was a very enriching project which allowed us in a team to understand better the causes and effects of corruption and pushed us to become more responsible citizens.

We chose to work on a project explaining how we would devise and sustain an anti-corruption club at school itself as we all believe in the wise words of Gandhi – “Be the change you want to see”. Thus, starting with the students of secondary school who are just about to step into this highly corrupted world of work seemed to be the best choice to us.

The project involved explaining how we would initiate the club, what would be the proposed activities by the club members, how these activities would actually help the club in achieving its goals, how we would sustain responsibly the club over the years; the progress recorded to really be more aware how much the project is fruitful. In the end, we would request to all secondary and even the primary schools to implement such a program in the curriculum of the students as it will become an urge to stop the ever-growing rate of corruption in Mauritius.

The anti-corruption project of the ICAC was an interesting task which involved a lot of dedication and hard work to be done. This project was meant to design an anti-corruption club in secondary institutions in order to make students become more conscious of how corruption is spreading its tentacles through vital sectors of our country. Thus, we believe that it will inculcate in students the will to bring a change to our corrupted society. In this project, we had to plan how to initiate the activities of the club and explain how to raise funds in order to support activities of the club over the coming years. Personally, I found the making of this anti corruption project very enriching as we had to gather and compile certain information and this enabled simple academic students to think like ICAC officers.
